

Mt. Carmel, Utah.  
May , 1939.

Mr. T. H. Humphries, State Engineer,  
Salt Lake City, Utah.

Dear Sir:

We, the undersigned, authorized representatives of a majority of the water users of the Rio Virgin in Kane County, Utah, have mutually agreed to address this letter to your office and request that

Ervin Hoyt of Orderville, Utah, be appointed from your office as WATER COMMISSIONER for this District for the Season of 1939.

We further recommend that his salary for this service shall be \$     per day while on duty measuring and regulating the water, and 75¢ per hour if occupied for less than a day. The estimated cost for the season shall be about \$ 100.00.

Since the Glendale Irrigation Company of Glendale, Utah, and the Orderville Irrigation Company of Orderville, Utah, and the Mount Carmel Irrigation Company of Mt. Carmel, Utah, own a great majority of the water in the said Rio Virgin District we have deemed it advisable to send in this request for the appointment of a water commissioner without waiting to contact all of the smaller independent users. But we feel certain that this recommendation will meet with their approval.

Yours truly,

Joseph F. Smith  
President of Glendale Irrigation Co.

Myron A. Holyate  
President of Orderville Irrigation Co.

Carl J. Sorenson  
President of Mt. Carmel Irrigation Co.
